

I understand your instructions: You want the uploaded reference image of the white butter crock edited by replacing the background with a pure white, Amazon-compliant backdrop. The product itself should remain completely unchanged—appearance, finish, size, shape, proportions, texture, and all original features/logos must be precisely preserved. Lighting should be bright and premium, subtly enhancing the crock's look, and the product should be perfectly centered. No other alterations are to be made.

However, I do not currently have access to the uploaded image file you referenced. Please upload the reference photo of the white butter crock, so I can proceed with your request according to your precise specifications.

Thank you for your detailed instructions. To generate your Amazon-compliant hero image of the white butter crock, I will:

- Place the original product precisely onto a pure white (#FFFFFF) background.
- Retain all product characteristics, logos, and details exactly as in your uploaded photo—no changes to size, shape, appearance, finish, or texture.
- Use only premium, bright, natural lighting with a subtle, realistic shadow beneath the crock (not floating).
- Center the product and maximize its presence in the frame, as requested.
- Ensure no packaging, text, or graphics are included—only the crock itself.

Here is your generated Amazon hero image:

If you need further adjustments or a different file format, please let me know!
