THE SACRED FOUNT

The Sacred Fount

by Henry James (1843-1916)

Published in 1901, *The Sacred Fount* delves into the interior observations and obsessions of one Englishman during a weekend gathering in the country.

Regarding himself as a master of human psychology, the narrator watches the goings-on of the other guests and weaves theories about the interpersonal implications of what he witnesses, leaving the not infrequently perplexed reader the task of sorting out whether his conclusions are facts or fancies.
