

# Phoebe

EFFICIENCY FOR EVERYONE

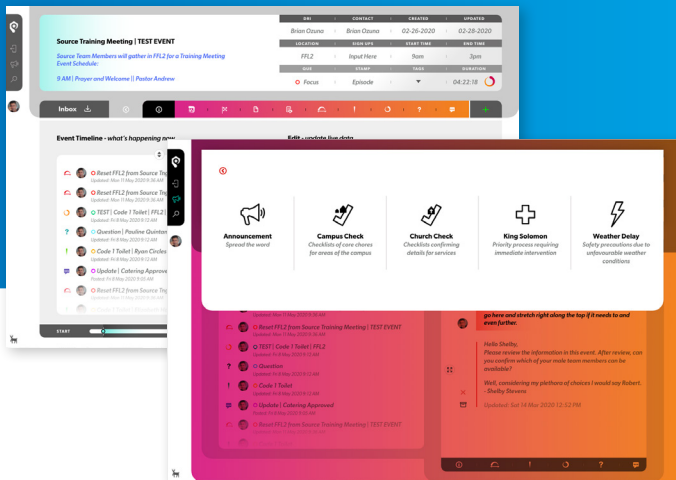

Phoebe helps administrate  
all your daily operations.

**Phoebe.io**

**Phoebe** simplifies your daily operations by pairing our approach to internal infrastructure with intelligent software, keeping all information in one location.

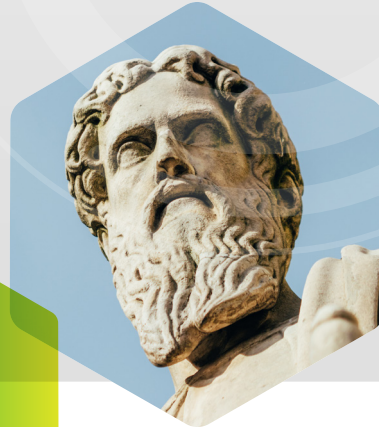

With it's flexible framework for teams,  
**Phoebe's** new approach to communication  
and daily operations helps volunteers,  
management, and leadership always stay on  
the same page.

*In the Bible, **Phoebe** was known as a “helper in the church”.*

*The Apostle Paul commended her as trusted leadership as she helped deliver his letter to the Romans. That’s what this 21st century version of **Phoebe** does, we help people administrate and advocate the way they work.*

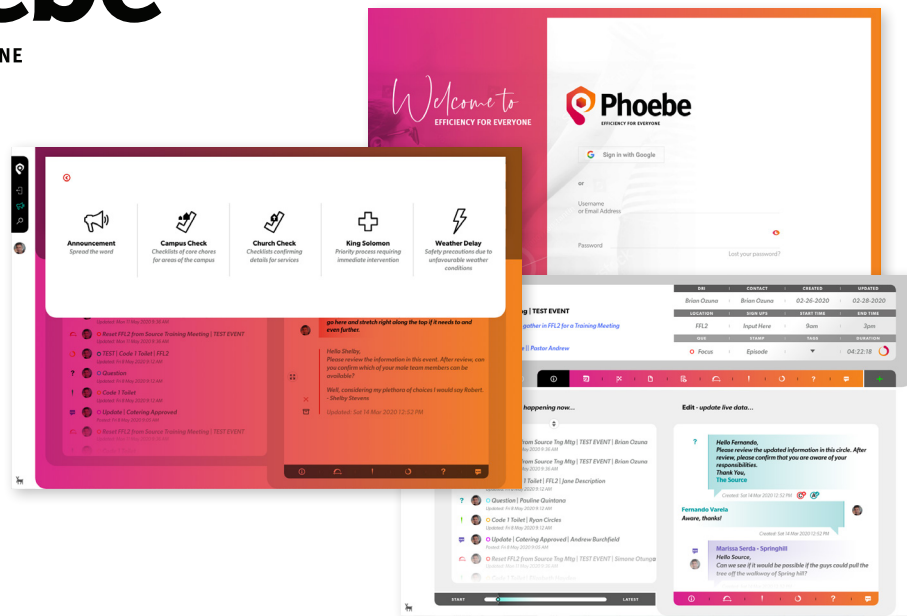

Internal operations can be challenging at any size to keep under control when people, information, and conditions are constantly changing. It's kind of like solving a Rubik's cube, each twist and turn affects every part of the operational outcome.

The background of the slide features a red-tinted image of a crowd of people. Overlaid on this is a large, semi-transparent orange-to-red gradient rectangle. At the bottom of the slide, there are several geometric shapes: a large orange hexagon and two smaller, light-colored 3D cubes.

Using **Phoebe** is like having a team of air traffic controllers solve your Rubik's cube for you.

For people leading and living behind the scenes, our approach promotes peace by increasing overall awareness, decreasing mis-communication, and multiplying ***efficiency for everyone.***
