TRIBE SOCIAL

Features

✔ **Zoom Integration**

Creators and admins can link their Tribe account to their Zoom account. Connect meetings and automatically archive calls for replay.

✔ **Decentralized Storage Storj**

All images and video files are automatically stored on a blockchain-based storage tech (Storj).

✔ **Private Live-streaming**

Stream live video to your audience from Zoom, Streamyard, or any streaming service. Maintain complete control of your live content and event.

✔ **Custom Domain and Branding**

Change logo and colors throughout your platform to match your brand. Use a custom domain for a fully white-label approach.

Case Studies

TRIBE SOCIAL

Ministry-owned app for 300,000+ Users

Worked with God Behind Bars (Pando App) to develop a new tablet application that is 100% owned by the organization.

We developed innovative new tech to create high reach and impact for the lowest server/hosting costs

- Scalable and affordable Decentralized Blockchain Video streaming
- Creator and user management for admin
- Web app, iOS App, and Android App developed
- Custom "prison-version" app, developed for secure distribution throughout prisons

STORJ
Private Decentralized Storage

livepeer
Private Decentralized Live Video

Decentralized Storage

Storj DCS uses a decentralized architecture that reduces complexity, increases security, and provides on-demand availability of your video files. If that wasn't enough, it also happens to be 80% more affordable than the storage and egress costs of traditional cloud storage providers.

STORJ

Pro Account

Get 150 GB of free storage and bandwidth. Only pay for what you use beyond that. Great for companies and larger projects.

STORAGE COST PER MONTH*

$4/TB

BANDWIDTH COST

$7/TB

TRIBE SOCIAL

Scalable Live Video

Livepeer is the world's open video infrastructure. Founded in 2017, Livepeer provides cost-efficient, secure, scalable, and reliable infrastructure that can handle today's high demand for video processing. Livepeer's decentralized network includes over 70,000 GPUs and currently processes millions of minutes a week.

Works with
